Key Terms

Advanced is designated by the 95th percentile. Scantron recommends additional academic review and/or cognitive assessment to identify students for gifted programs.

At Risk students are those who score below the interquartile range for their enrolled grade. At this level, students risk not being able to progress at the same rate as their peers. Additional academic and/or behavioral review is recommended for potential identification.

The **Interquartile Range** provides the grade-level scores from the 25th percentile to the 75th percentile, or the middle 50% of the students enrolled in each grade. Students within this range are performing similarly to their peers.

Use **Fall** values between August and November. Use **Winter** values between January and February. Use **Spring** values between March and June. Scores for the **Winter** norm group are interpolated based on the **Fall** and **Spring** groups. The interpolated **Winter** norm scores were calculated as the average of the Fall and Spring norm scores.
